Chip,

The contractor for the stormwater work is Maverick Construction Management Services, Inc. They are out of King of Prussia PA. Apparently, this contractor has performed work for Arkema at a # of projects around the country. They have hired some local labor to augment their core team.

My understanding is that Akrema has awarded the barrier wall construction contract to Envirocon who has a Portland office.

They are still working the bid process for construction of the groundwater extraction and treatment system.

Matt

Matt - Do you have info on the contractor(s) doing the uplands work at Arkema? Just wondering if they are local.
